Action:- After clicking on "Go TO Login", the page will redirect to "LOGIN". No validations are required. Just need to create design.

**By default "Sign Up" page will load**

After clicking on the "Login" button page will redirect to "DASHBOARD PAGE". No validations are required.

After clicking on the "Sign up" link, page will redirect to "Sign Up" page

DASHBOARD

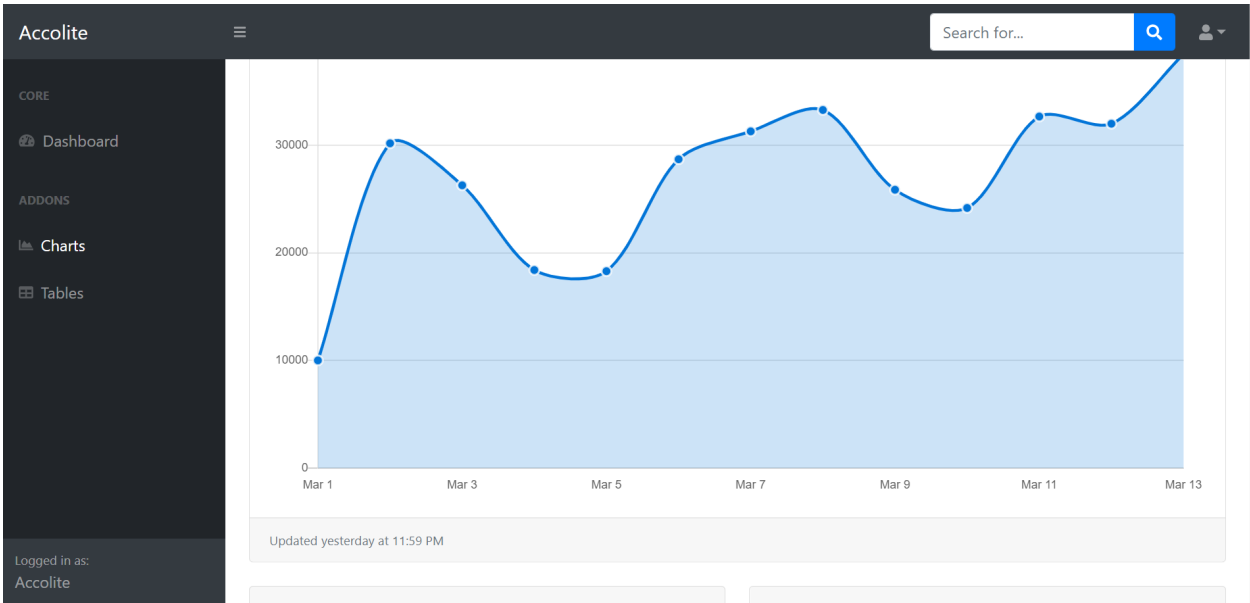

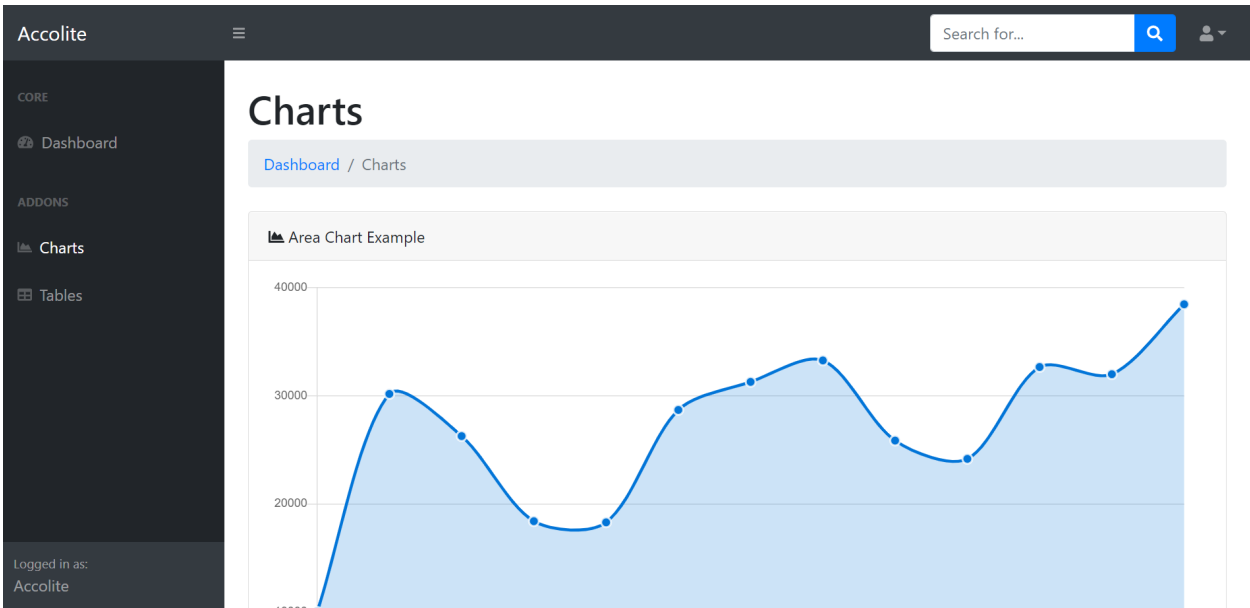

- Active link color will be white
- There will be no links on "View Details". Just need to create design
- create chart, using chartjs/highcharts library
- Create dumb components for graph. So we can reuse it anywhere. we just need to pass data from parent component

- For table we have to use AgGrid
- AgGrid UI will be different from this table but most of the options we will get there
